SPEAKER PRO TEMPORE

August 17, 1990

The Honorable William K. Reilly, Administrator
Environmental Protection Agency
401 M. Street, Southwest
Washington, D.C. 20460

Dear Mr. Reilly:

Clean Air is a top priority in Tennessee. I work and reside in and around a major metropolitan area and we are constantly battling the problems having to do with automobile emissions. Any new technical advances to help alleviate these problems should be given careful attention.

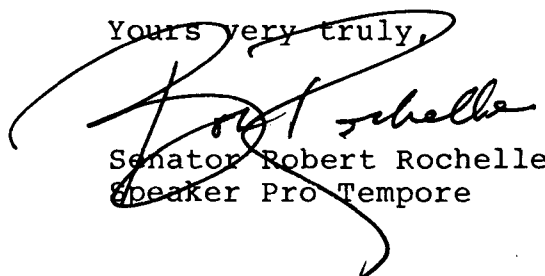

It is my understanding that you are presently studying the new performance additive HiTec 3000. This has peaked my interest since tests show it significantly reduces smog-producing nitrogen oxide, along with boosting octane levels and reducing overall tailpipe emissions. Refiners should also be able to reduce toxic aromatics and fuel vapor pressure with the use of this new additive.

Since the Canadians have already been using this additive with success, I would think it certainly warrants your serious attention.

Thank you for hearing my concerns and for helping to keep this nation on the cutting edge of the world's environmental progress.

With kindest regards, I am

Yours very truly,

Senator Robert Rochelle
Speaker Pro Tempore
